Scalable Amplified Group Environment (SAGE2™)

A framework enabling participants to access, display and share a variety of data-intensive information, in a variety of resolutions and formats, from multiple sources, on tiled display walls of arbitrary size.

- Digital-cinema animations
- High-resolution images
- High-definition video-teleconferences
- Presentation slides
- Documents
- Spreadsheets
- Laptop screens
Scalable Amplified Group Environment (SAGE2™)

Current web-based collaboration systems, such as Google Hangouts, WebEx, and Skype, primarily enable single users to work with remote collaborators through video conferencing and desktop mirroring.

SAGE2 using cloud-based and web-browser technologies enhances data intensive co-located and remote collaboration.
Users want to juxtapose more than one visualization, not use the entire wall for a single visualization.
Users want to juxtapose more than one visualization, not use the entire wall for a single visualization.
Scalable Amplified Group Environment (SAGE2™)

Users want to juxtapose more than one visualization, not use the entire wall for a single visualization.
Scalable Amplified Group Environment (SAGE2™)

- cross-platform
- community-driven
- open-source
- using cloud-based and web-browser technologies
- enhances data intensive co-located and remote collaboration
- juxtaposing large volumes of information in ultra high-resolution
- based on SAGE developed in 2004 by EVL
- Adopted at over one hundred international sites
Scalable Amplified Group Environment (SAGE2™)

Upgrading EVL’s 18-screen wall to a single PC
