

# Triage

When there is no time to spare.

Triage is a volunteer medical emergency application that allows off-duty medical professionals to respond to severe 911 calls on the fly. Triage allows the professional to serve as a buffer zone in situations where they might arrive before the ambulance does.

# Objectives

To create an application that can really make a difference anywhere in the world.

To increase response time for victims who need it when the ambulance is unable to.

To allow for professionals to give back to the community at times when they are comfortable.

To set-up a framework that can serve as an example of how emergency procedures may be re-examined with the advent of new technologies.

# Issue at hand

**“There is no nationwide standard for measuring emergency response times.**

A *USA TODAY* study of the 50 biggest U.S. cities found that **most report only the slice of the response that looks most favorable: the time it takes for the emergency crew to drive to the scene.** On many emergency runs, that is just a fraction of the time that passes between the call for help and the arrival of rescuers.

Yet most cities base quality-control decisions on these official response times, which are misleading and incomplete. As a result, people die, and attempts to improve survival rates fail.

**More than 1,000 “saveable” lives are lost needlessly each year in the nation’s biggest cities because of inefficiencies in the cities’ emergency medical systems,** *USA TODAY’s* investigation found, and at the root of these inefficiencies in many cases is the simple matter of counting seconds.”

**\*Medical Emergency**

UNITED HATZALAH SAVES LIVES. ALL THE TIME. EVERYWHERE.

## WHEN SECONDS COUNT!

United Hatzalah's response time is now under **3 minutes**. By doubling the current volunteer corps and increasing the ambulance fleet and defibrillators, United Hatzalah will achieve its goal of a **90 second** response time - anywhere in the country.

[Click here](#) to learn more about why 3 minutes is already a world-record response time and why a 90 second response time will save more lives.

But we can't do any of that without your help. **We need you now. Help us.** And may you never come to need us.

## Description

Hatzalah is a volunteer ambulance organization with chapters all around the world.

This app puts an emergency Hatzalah button on your home screen in just two easy steps:

1. Choose the phone number of your local Hatzalah chapter.
2. Open the settings app and enable "Call on Launch" to finish set up.

You have an emergency Hatzalah button on your home screen! Tap the icon if have to call Hatzalah, G-d forbid.

To change the number, disable "Call on Launch" and relaunch the app.

-----

This app requires Skype and WiFi to work on iPad or iPod touch.

If you discover a problem, or have feedback, contact me at yetanotheriphoneapp@gmail.com. The subject of your email should be "Hatzalah Feedback". Thanks for all of the suggestions, keep the good ratings coming!

One page app that forwards directly to local Hatzalah chapters.

Does not call 911.

Must rely solely on Hatzalah response.

Please correct Chicago number to 8475041500

# Hypothesis

Can I create an application that can positively impact medical emergencies?

# Concept

Create an application that pools resources from volunteer medical professionals.

# Refined

Synchronize the warning system with current 911 infrastructure (Conceptually)  
Embedd an agreement document within app to help protect volunteers from future legal issues

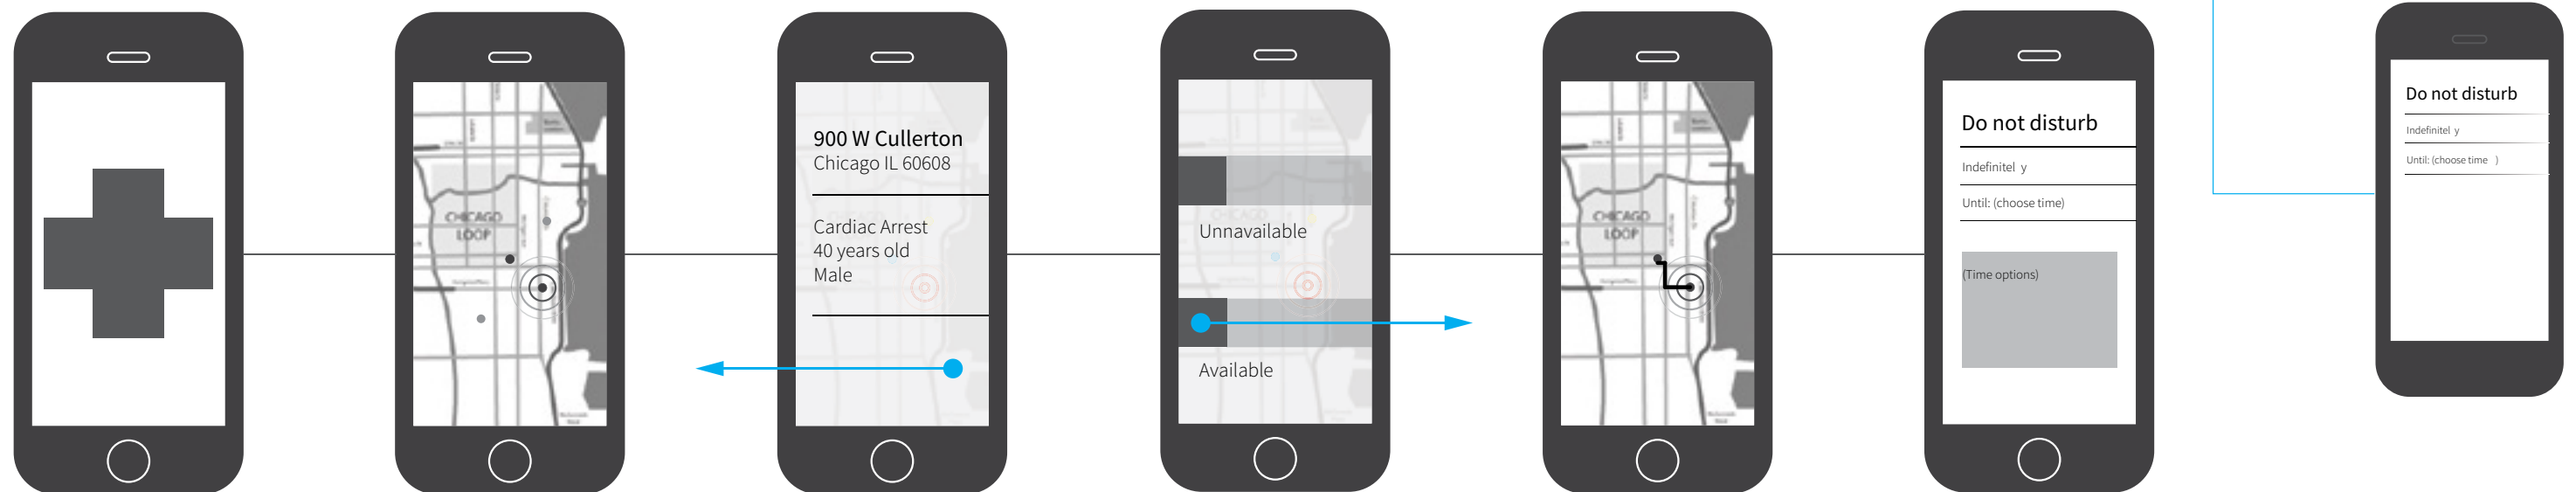

# Wireframes

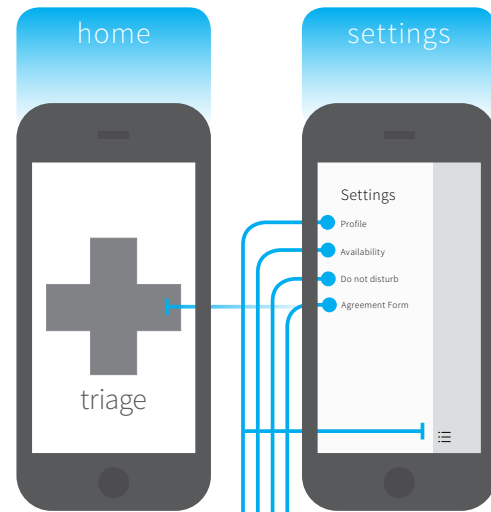

Focused around creating a minimal amount of screens and intuitive interaction.

Influenced by iOS 7 and Google Maps interaction and interface

One legible typeface with minimal amount of variation

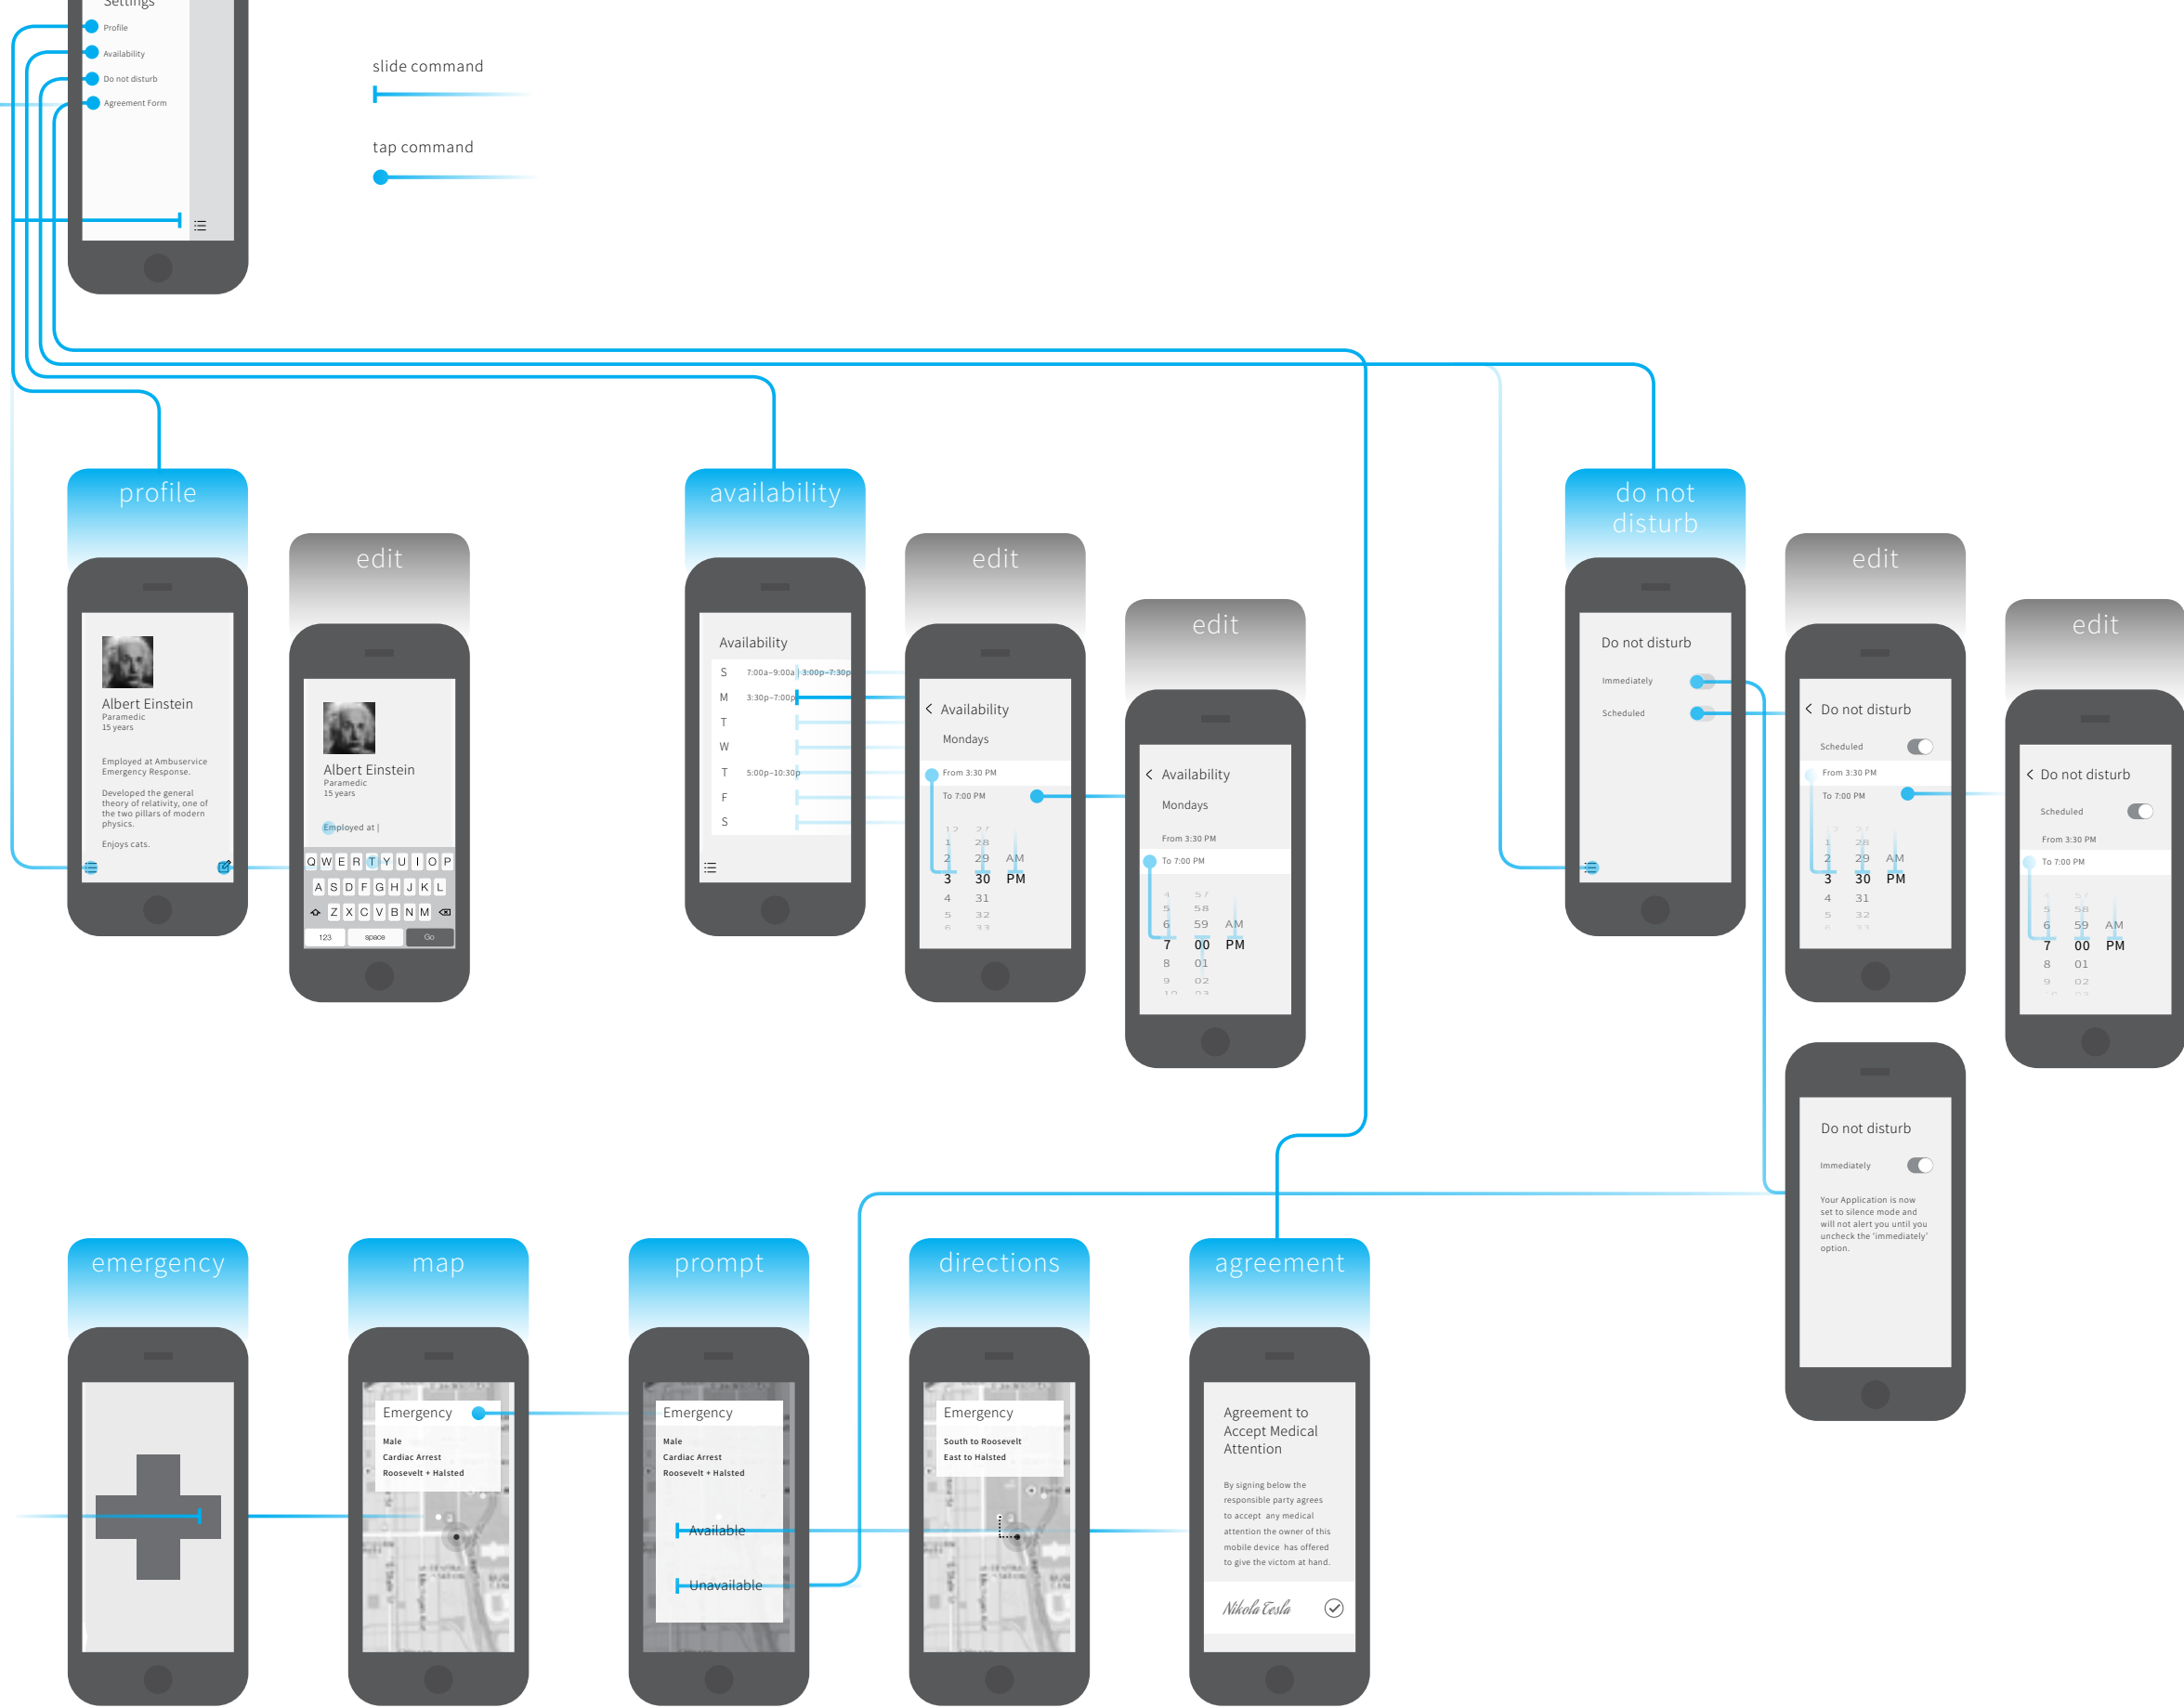

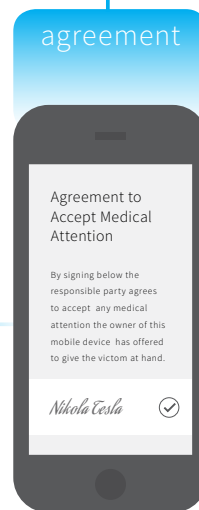

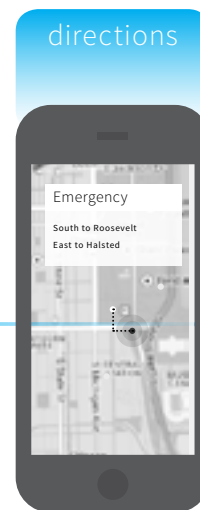

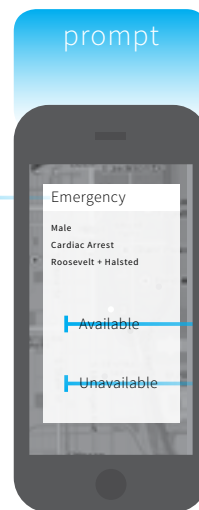

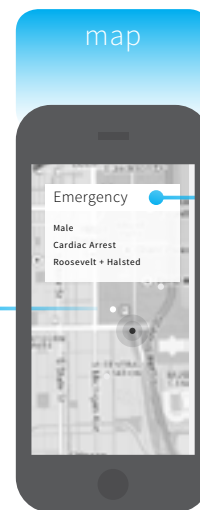

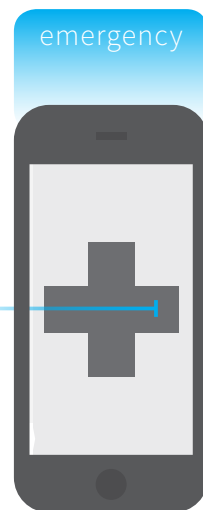

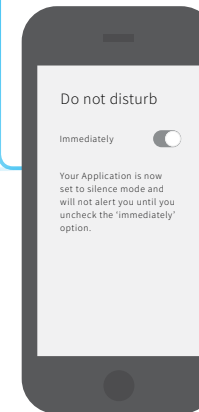

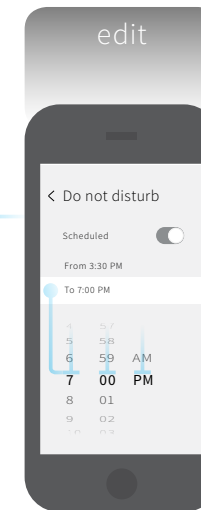

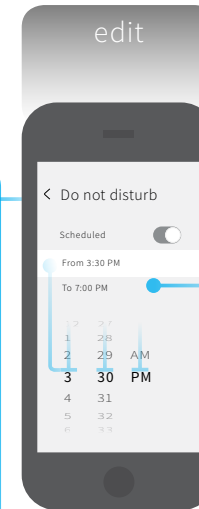

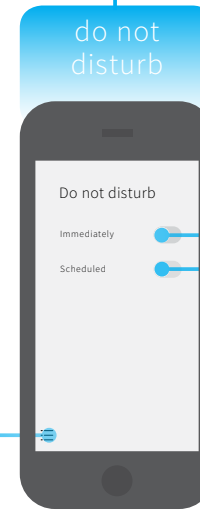

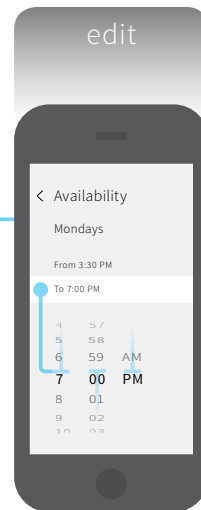

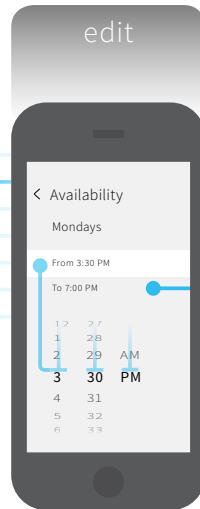

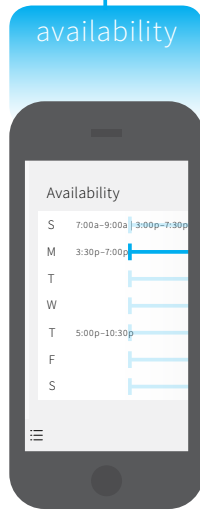

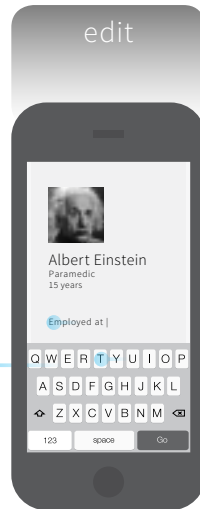

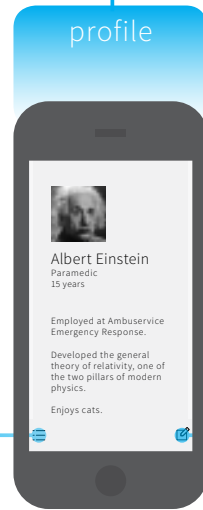

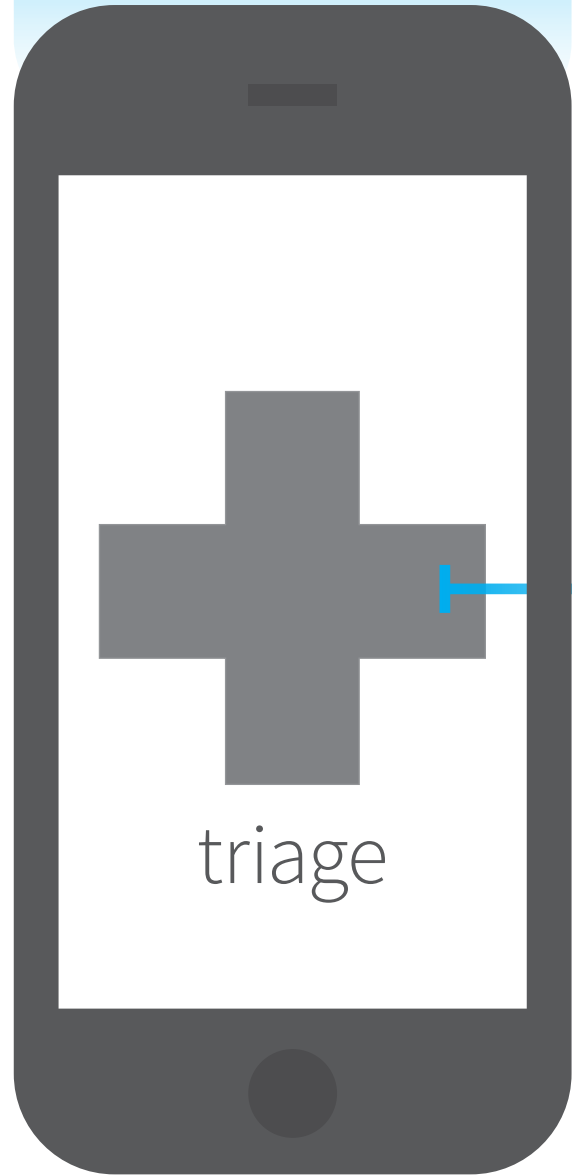

# Flowchart

slide command

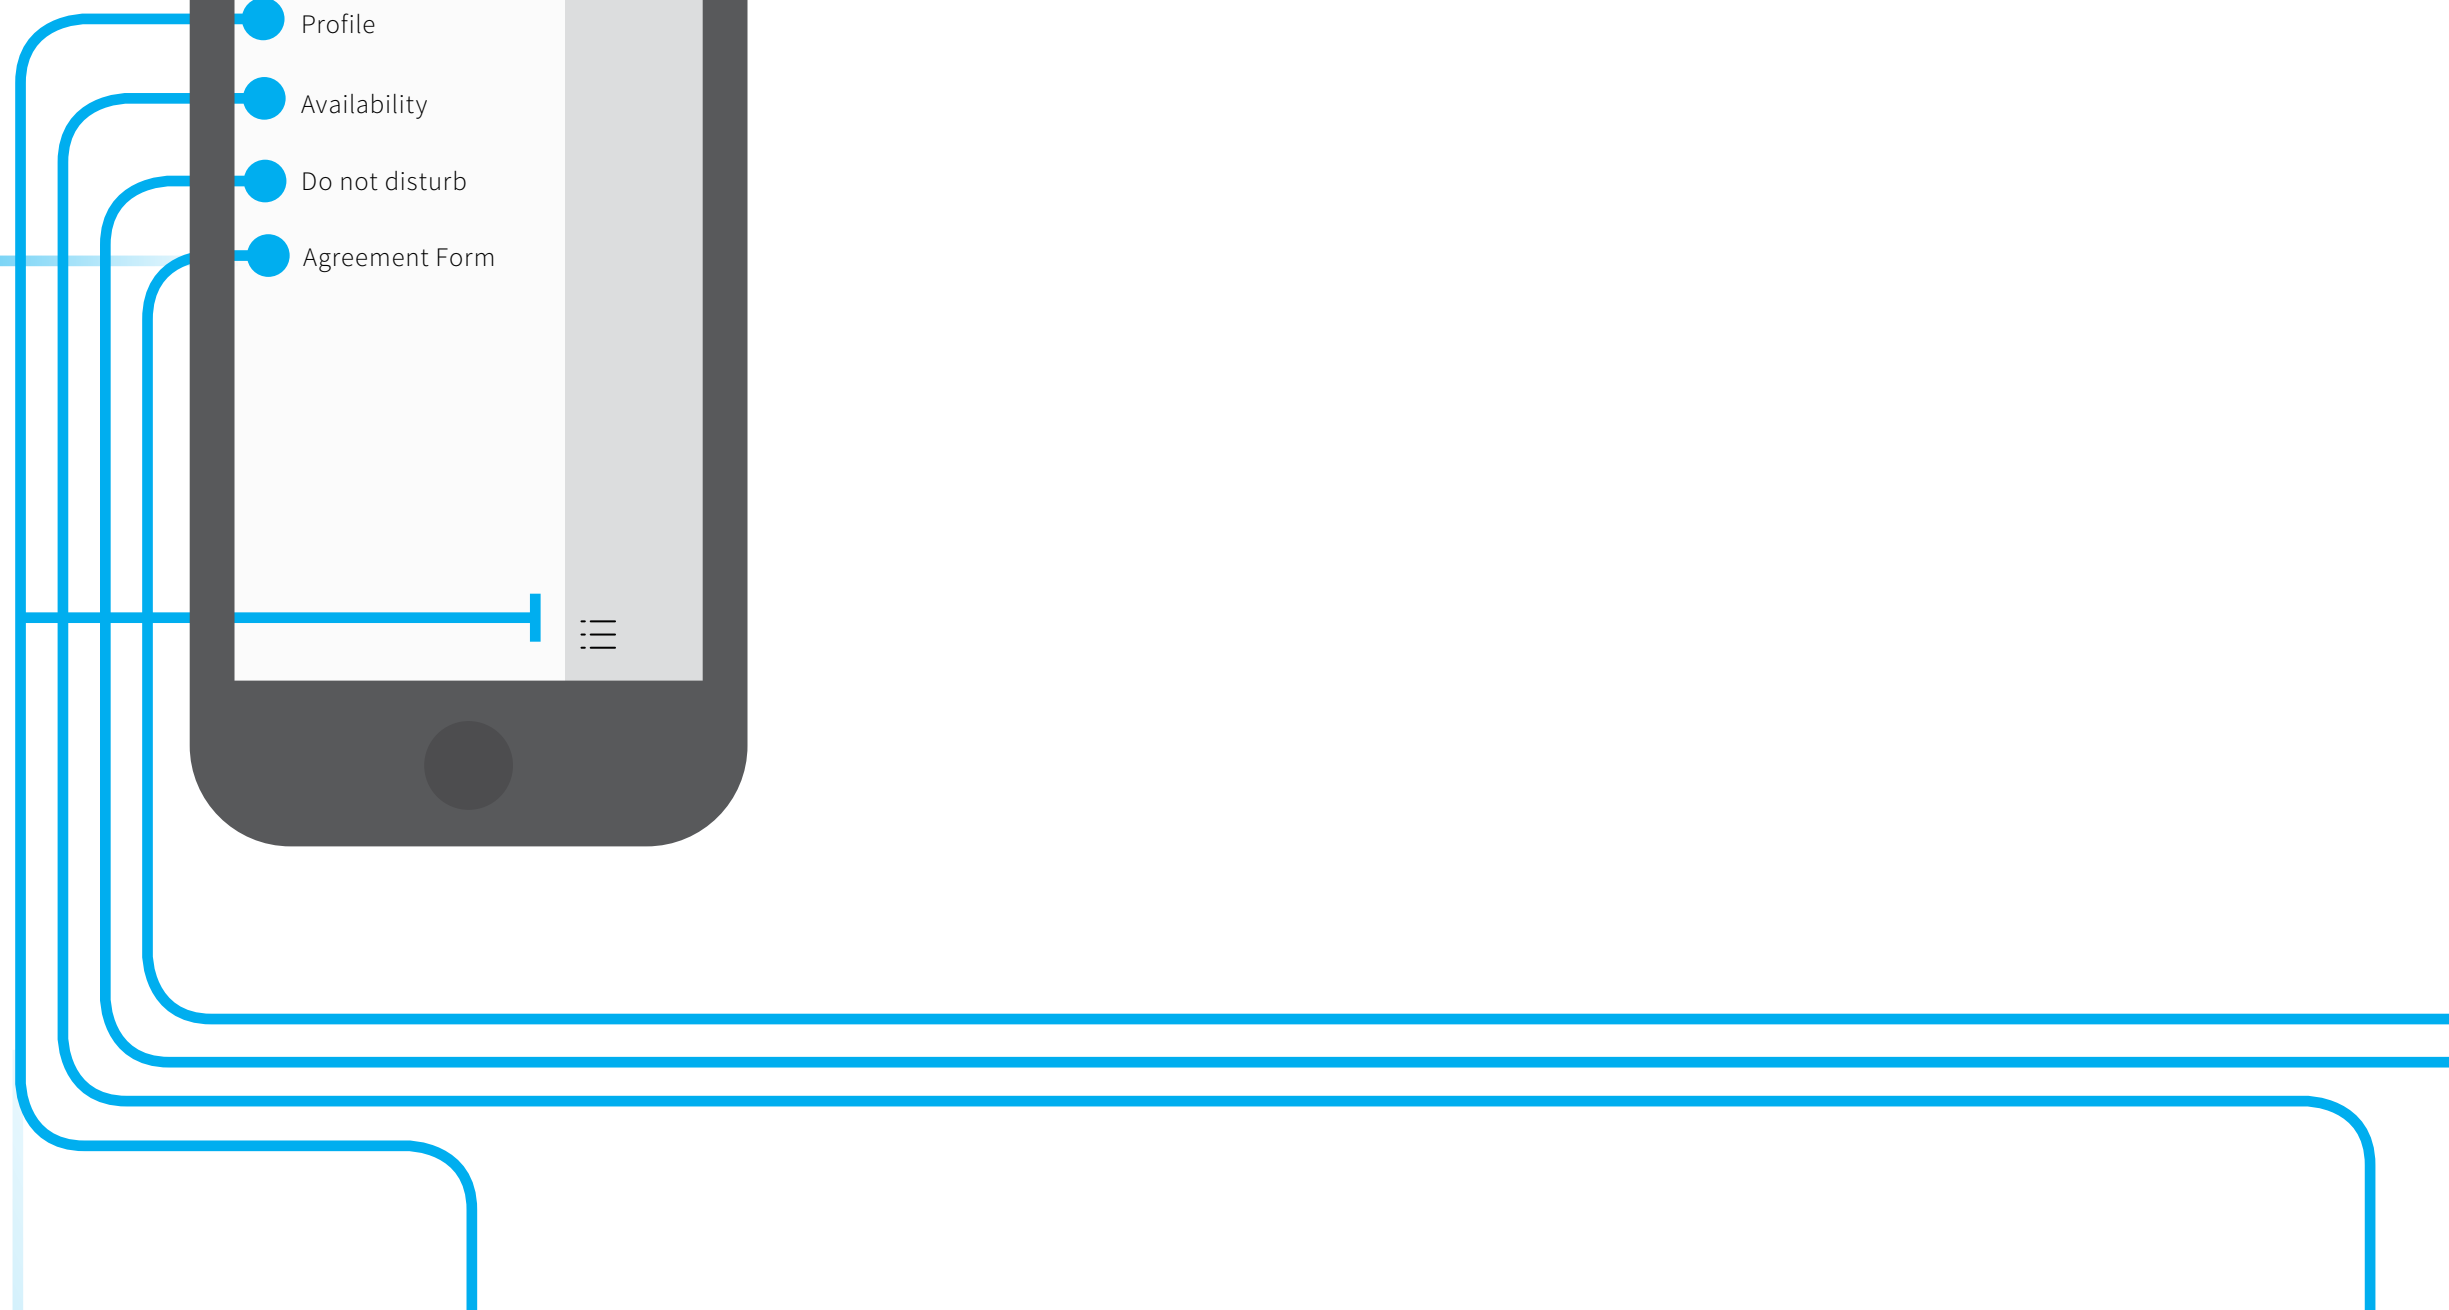

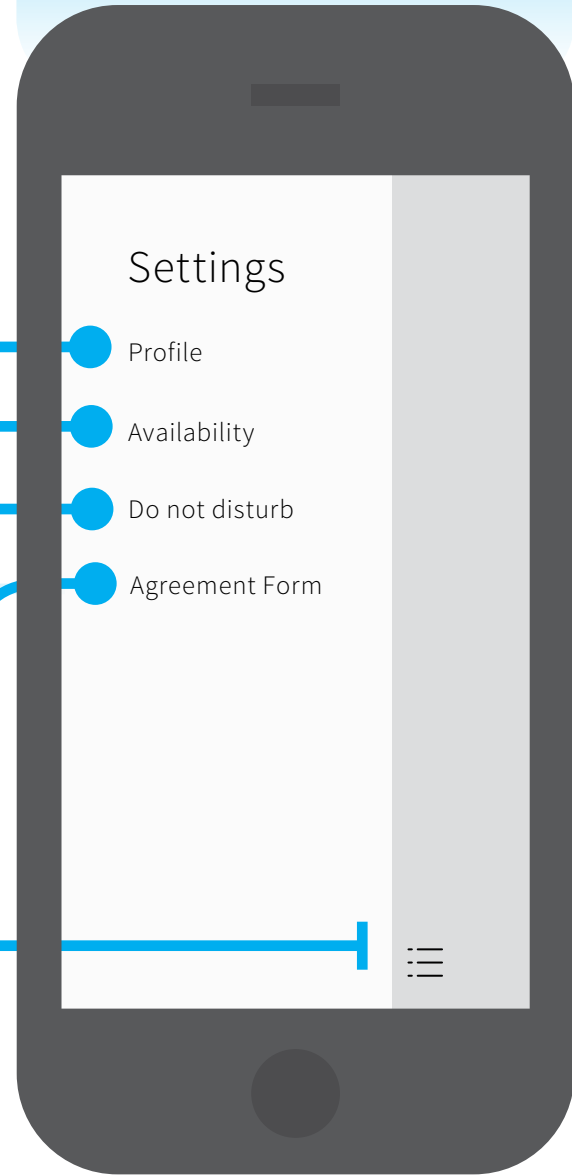

tap command

directions

agreement

# Audience

Medical Professionals who are eligible to participate

Must have documents that certify education and expertise in profession  
(EMT, Firefighter, PhD, RN, LPN)

International application would only require language and legal  
adjustments specific to the region

Any medical association may be interested in supporting the application  
as it will alleviate trauma on a large scale

# Benefits

# Saving lives!

Altruistic desires for medical professionals

May possibly serve as an innovative influence for current emergency response systems infrastructure

Help connect medical professionals from various disciplines

# Production

Hopefully the app can work on both iOS, Android, and Windows

App may have supplemental website to help educate on its benefits

App may have potential to create a standalone charity organization
