Comprehensive Collaboration

SAGE3, using cloud-based and web-browser technologies, enhances data intensive co-located and remote collaboration

Users want to juxtapose **more than one** visualization, not use the entire wall for a single visualization.

A high-resolution, rich media collaboration

**cross-platform
community-driven
open-source
using cloud-based and
web-browser technologies
enhances data intensive
co-located and remote
collaboration
juxtaposing large volumes
of information in ultra
high-resolution
based on SAGE developed
in 2004 by EVL
adopted at over one
hundred international sites**

**Upgrading EVL's 18-screen
wall to a single PC**
